Summary

A dedicated Junior React Developer with a focus on building dynamic and responsive web applications. I have a strong foundation in JavaScript (ES6+), React.js, and modern front-end tools. My experience spans from crafting reusable components to managing complex application states and integrating APIs to deliver seamless user interfaces. I am passionate about clean code and creating intuitive digital experiences, and I am eager to contribute these technical skills to a professional development team

Education

Alexandria University, Bachelor's Degree

2018 – 2022

Alexandria , Egypt

frontend web development diploma [🔗](#), SEFF

12/2022 – 03/2023

Completed coursework in Front-End Web Development, mastering HTML, CSS, JavaScript, React.js, and Redux through structured online programs and applied projects.

Alexandria , Egypt

Projects

Portfolio [🔗](#)

- Designed and built a sleek, responsive personal portfolio website using React.js, JavaScript (ES6+), and clean HTML/CSS.
- Created modular, reusable components to showcase personal projects, technical skills, and experience.

Task Manager [🔗](#)

- Developed a modern, responsive frontend for a task management web application using React.js and integrated it with a backend API.
- Implemented full CRUD operations and secure user authentication to ensure a seamless, dynamic user experience.
- Managed complex application states and optimized the user interface for cross-device responsiveness.

Crochet Counter [🔗](#)

- Built a lightweight, interactive web application using JavaScript and React.js to help users track stitches and rows in crochet projects.
- Implemented local state management to provide real-time updates and an intuitive, user-friendly digital counter.
